# visco-elastic foam

## About memory foam

NASA originally developed visco-elastic foam for use by astronauts to provide optimal support over extended time periods, and particularly during lift-off and re-entry, since those tend to be the times that create the greatest amount of pressure sensitivity in the body. This open-celled, porous, viscous foam material became known as “memory foam” because it was designed to sense the unique body temperature and weight of the astronaut and gently conform to the shape of his or her body to provide the perfect amount of support in any environment.

Once the word got out about this revolutionary material, the medical community saw its benefits to their physical therapy patients, bedridden patients and burn victims. By correctly and individually supporting the injured areas, memory foam insulated pressure points and created a level of comfort that reduced pain and allowed injuries to heal more quickly.

Automatically responds to body heat and pressure, creating personalized comfort

Evenly distributes weight on the body's critical pressure points

Transfers pressure away from the vertebrae

Yields just enough to allow for proper alignment of the spine

# head positioners

head ring positions the head and ear during surgery

Our two types of head positioner pillows gently mold to the body's contours, positioning the head properly to release pressure points and banish pinched nerves.

<i>Item #</i>	<i>Description</i>	<i>Size</i>	<i>Qty</i>
CA1004HP	Disposable Pediatric	4½"W x 5"L x 2¼"H	48/CS
CA1005HP	Disposable Child	7"W x 6¼"L x 3½"H	24/CS
CA1006HP	Disposable Adult	9"W x 8"L x 4¼"H	24/CS
CA1007HP	Memory Pediatric	4½"W x 5"L x 2¼"H	48/CS
CA1008HP	Memory Child	7"W x 6¼"L x 3½"H	24/CS
CA1009HP	Memory Adult	9"W x 8"L x 4 ¼"H	24/CS

All disposable positioners are made from medical-grade polyurethane foam that is flame retardant, antifungal and bacteria resistant.

Each product is also customizable and all our reusable medical products are covered in impermeable, anti-fungal, antimicrobial, washable material. We offer disposable and reusable products in polyurethane foam or memory foam. Our medical supply products are available in the dimensions listed in the charts accompanying each description. When you place your order, we compress and vacuum seal each product, reducing your shipping costs and allowing you to conserve storage space.

# round foam

## positioners

*Disperses pressure under the head to eliminate head movement during surgery.*

**Affordable. Versatile. Customizable.**

Balancing costs with the needs of patients is one of the health care industry's biggest challenges. At Confortaire, we understand your need for reliable, quality medical supplies that provide comfort and speed the healing process while controlling costs.

Our goal as a factory-direct manufacturer of polyurethane foam, and memory foam products for the medical community is to provide you with fast, reliable service and affordable, customizable products that allow you to cut costs and help your physicians and health care providers give their patients the best care they can.

**Improve and customize the quality of care you deliver – and save money.**

It sounds impossible, but buying factory-direct from us gives you options that buying from other providers of medical foam supplies can't, because you deal directly with Confortaire, the manufacturer, and not a third party.

We produce a wide range of products that offer optimum patient safety and comfort, and we can customize any of our products to your specifications or CAD drawings and ship them to you overnight.

So you really can spend less money while helping to improve the quality of care you provide to your community.

Call us to discover more about our top quality, affordable, customizable product line that will help your health care providers deliver safe, comfortable care and accelerate patient recovery while making your medical facility a more efficient community resource.

## wheelchair cushions\*

*High density foam provides seating comfort, reduces pressure and encourages circulation while using a wheelchair.*

Item #	Description	Size	QTY
